## SKILLS

- Working with others
- Ruby, JS, Java, C++, MATLAB, Python, Visual Basic
- Ridiculously good with numbers
- Strong knowledge of music industry and related technology, with studio experience in producing and recording

## WORK HISTORY

### Peets Coffee and Tea (2012 - present)

I frequently train new employees and guide drink making. This job has taught me to multitask, work at a fast pace, have instant recall of a vast array of information, and talk to just about anybody. Ive also served as the store's Barista Competition representative for the last two years, both times winning at the District Level.

### Private Tutor (2013 - present)

I have tutored 1000+ hours to date in everything from elementary school math to all levels of Calculus, Differential Equations, Linear Algebra, Physics, Statistics, Music Theory, etc. This job has taught me how to explain things in many ways and has fortified my memory of all things math.

### Music Lessons (2013 - present)

Instructor at Rock Inc., a school of music in Citrus Heights, CA. Anything from the basics to music theory, jazz, and improvisation. Some of my math students have been introduced to music through my lessons.
